

Ahmed Hesham

Cybersecurity Student | Full-Stack Developer [LinkedIn Profile] | [GitHub Portfolio] | [Email Address] | [Phone Number]

PROFESSIONAL SUMMARY

Dedicated Cybersecurity student at Future University in Egypt (FUE) with a strong foundation in network security, digital forensics, and full-stack web development. Experienced in building secure applications using the MERN stack and configuring complex network infrastructures. Passionate about protecting digital assets and solving complex technical challenges.

TECHNICAL SKILLS

- **Cybersecurity:** Network Security (ACLs, Subnetting), Penetration Testing (Kali Linux, Nmap), Digital Forensics (Autopsy, Hashcat), OSINT (Maltego).
- **Web Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Express.js, Node.js, MongoDB.
- **Tools & Systems:** Cisco Packet Tracer, VirtualBox (Metasploitable 2), EMU8086 (x86 Assembly), Git/GitHub.
- **Core Concepts:** CIA Triad, McCumber Cube, OSI Model, TCP/IP.

KEY PROJECTS

Full-Stack Portfolio & Skill Dashboard | *React.js, CSS3, Framer Motion*

- Developed a responsive personal portfolio featuring a dynamic "Skill Meter" carousel.
- Implemented custom CSS animations and SVG gradients for high-end UI/UX.

Network Infrastructure Lab | *Cisco Packet Tracer*

- Designed and configured a multi-department network with VLAN segmentation.
- Implemented strict Access Control Lists (ACLs) to enforce security policies and traffic filtering.

Full-Stack To-Do Application | *MERN Stack (MongoDB, Express, React, Node)*

- Built a CRUD application with a React frontend and an Express/Node.js backend.
- Managed state and API integrations to ensure real-time data persistence.

EDUCATION

Bachelor of Science in Cybersecurity | *Expected 202X Future University in Egypt (FUE)*

- Relevant Coursework: Computer Architecture (x86), Data Communications, Digital Forensics, Network Administration.

CERTIFICATIONS & TRAINING

- Cisco Certified Support Technician (CCST) - Networking (In Progress)
- Web Development Bootcamp (Full-Stack focus)
